-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 and 27-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kubota (US 6 845 649) in view of Koerner (US 6 351 704). Kubota discloses a throttle calibration control with a throttle actuator position is determined within the range of an idle position.

However, Kubota does not show the use of a WOT position based upon a fixed position from the idle position. Koerner shows that the set up a WOT position based upon the idle position is old and well known in the art. Since the prior art references art from the same field of endeavor, the purpose disclosed by Koerner would have been recognized in the pertinent art of Kubota.

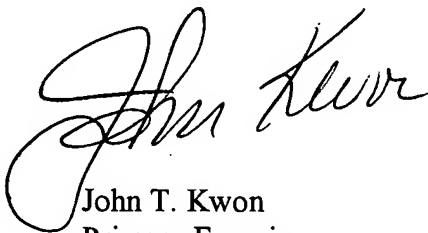

Therefore, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to provide the device of Kubota with the WOT position based upon the idle position as taught by Koerner. Regarding the claimed particular angular position for the idle position, it would have been considered to be an obvious choice of mechanical design because one skilled in this art is familiar with basic mechanic and normally has the laboratory test facilities. To optimize or select the suitable angular position would be within the ability of ordinary skilled in this art.
